Jest
Node Package Manager
MySQL
Slack
Git
Google Workspace
Adobe Photoshop
Adobe InDesign

As a Full-Stack Engineer, I bring the ability to think creatively and critically to technologies such as Angular, React, CSS3, GraphQL, NodeJs and Typescript, while using my ability to communicate, in an effort to work with and lead others toward finding a solution or reaching a common goal.

EXPERIENCE

Full-Stack Software Engineer

Lucid Creative LLC • Portland, OR • January 2020–Present

- Work full-stack on products to implement new features and re-factor existing features
- Optimize code performance and logical clarity
- Spearheaded team implementation of end-to-end testing with Cypress.io
- Provided test coverage for roughly 80% of server-side application functions
- Undertook and completed a re-factor of the GraphQL schema

Independent Contractor

Self-employed • Portland, OR • January 2019–January 2020

- Assisted clients with various woodworking tasks through consultation with the customer about the feasibility of each woodworking project
- Suggested amendments to customer design
- Created custom wood projects based on client-approved designs

Production Lead

Sturdi-Bult Greenhouse Manufacturing • Portland, OR • September 2015–January 2019

- Created high quality doors, bar-caps, and crates in a timely manner
- Trained new employees while maintaining quality and timely completion of parts
- Created and implemented new ways to crate products increasing production without increased labor
- Stepped in as 'Acting Shop Foreman' when needed

EDUCATION

Full-Stack Web Development Certificate

University of Oregon — 2019

BFA—Fine Art Painting

San Francisco Art Institute — 2013–2015
